

What to do?

1. Design the product/solution: Create 2 completely different designs (use extra paper if you need)

1.1 Idea1

- Define the sketch (with measurements)
- List the materials and tools you need
- Mention Pros and Cons for this sketch

1.2. Idea2

- Define the sketch (with measurements)
- List the materials and tools you need
- Mention Pros and Cons for this sketch

1.3. Select one design and explain why.

We chose idea 2 because it is more interactive and more fun, but in idea 2 we also use idea 1.

2. Plan the product/solution: List the steps necessary to complete your design.

What needs to be done?	By whom and when?	What do we need? (resources)
1. Get materials needed		bristol board, scissors, velcro
2. Cut out cards for memory game		scissors, bristol board
3. Write each step on a card (x2)		cards, scissors, a pen
